

Sales Dashboard Project Report

Task Description:

Objective:

Create a basic interactive dashboard that shows sales performance by product, region, and month.

Tools: Power BI

Dataset: Superstore_Sales.csv

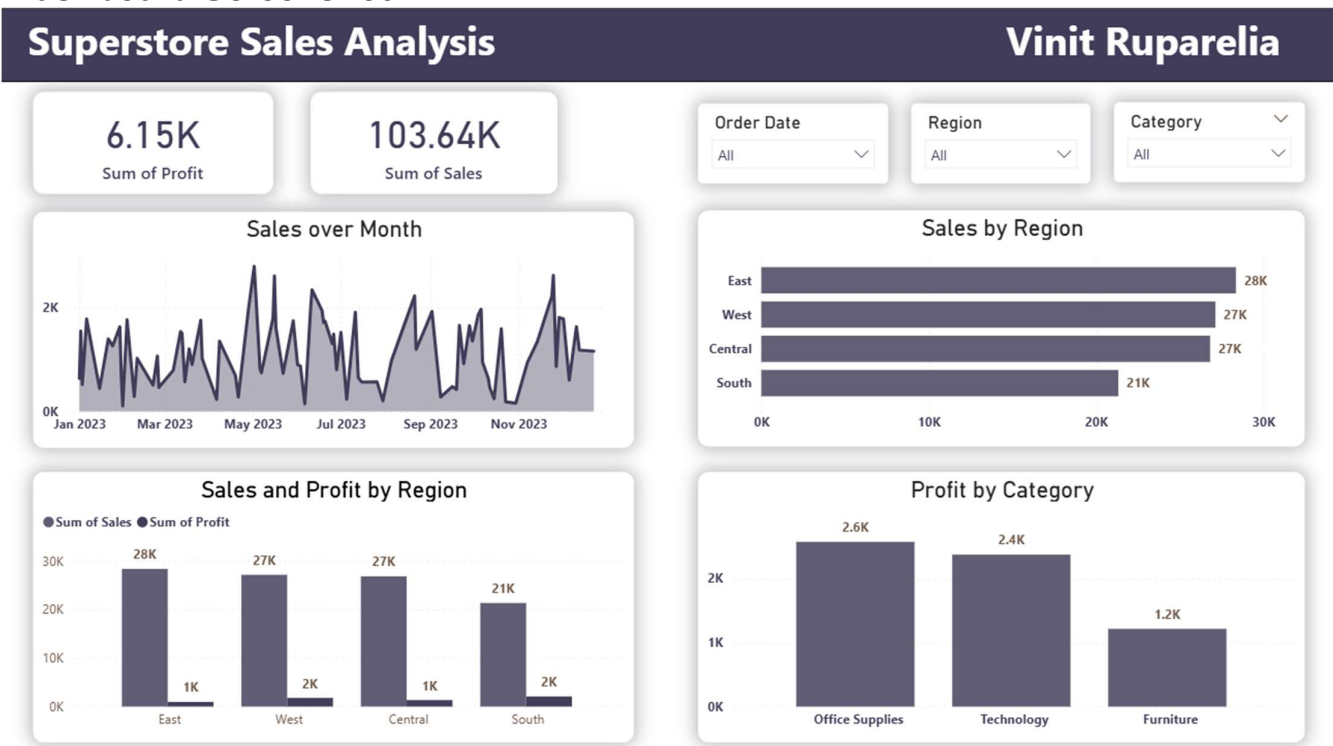

Deliverables:

1. A screenshot of the dashboard
2. 3-4 insights based on the analysis

Steps Followed:

- Import CSV into Power BI
- Convert Order Date to 'Month-Year' format
- Create visuals (Line chart, Bar chart)
- Add slicers for Region and Category
- Highlight top-performing areas with color

Dashboard Screenshot:

Work Done in the Dashboard:

- Imported the dataset into Power BI
- Transformed 'Order Date' to Month-Year format for time-based analysis
- Created a Line Chart for Sales over Months
- Used Bar Charts to show Sales by Region and Profit by Category
- Added slicers for Region, Category, and Order Date for interactivity
- Used consistent colors to highlight top-performing areas clearly

Key Insights:

- East region had the highest sales (~28K), followed by West and Central.
- South achieved ~2K profit despite lower sales, showing strong efficiency.
- Office Supplies was the top-profit category (~2.6K).
- Sales peaked in May and November 2023 - seasonal demand.
